

Computer Science 3 | Second Quarter Project

Members:

Ambe, Rogenn I.
Maclang, Marcisco Enzo L.
Peligro, Ellah Faith L.

Section: 9 - Lithium

Date: December 5, 2025

WHY WE CHOSE THIS TOPIC:

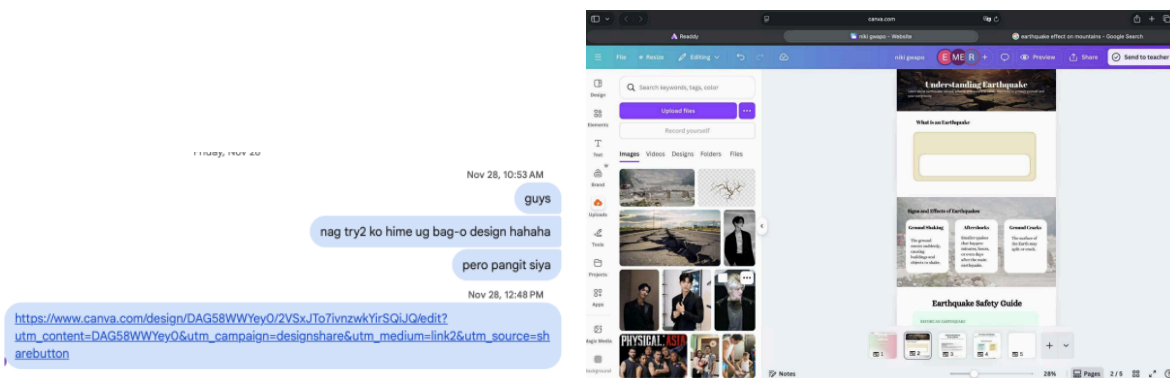

We chose this topic because we wanted to create something genuinely helpful for our community. With the recent earthquakes and typhoons in the Philippines, we realized how important it is for people to have quick access to a clear and reliable source of safety information.

By making this project, we hope to help others to become more prepared and confident during disasters. We also wanted to raise awareness especially among students and families, so that they can stay informed, stay connected and stay safe. This topic matters to us because disaster can happen any time, and having the right knowledge can make a huge difference.

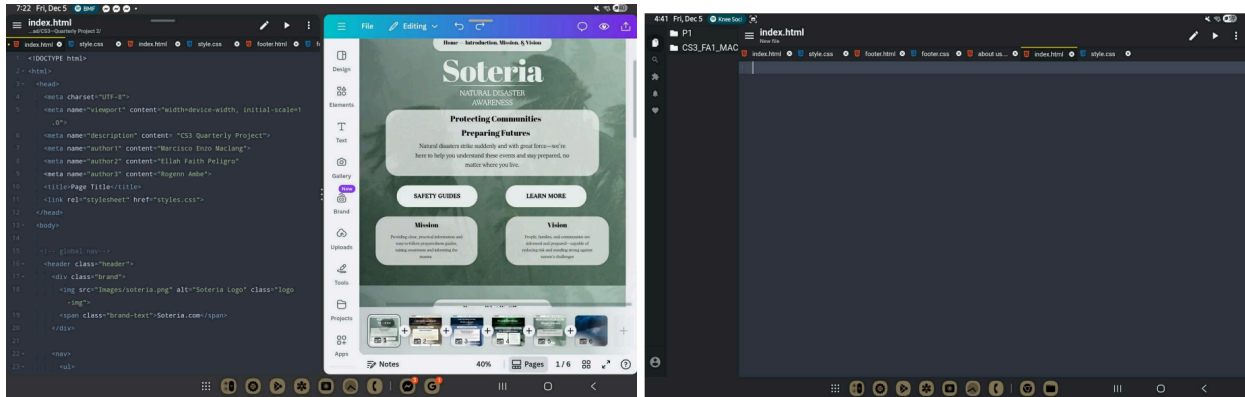

CONTRIBUTIONS:

Enzo contributed a lot to the coding and also helped with some of the designs, doing a great job. Ellah was heavily involved in research and designing the website, and she did really well. Rogenn worked on creating the layout and, together with the team, helped with the research and design, doing a solid job. Overall, everyone pitched in in their own way, and the project turned out well thanks to the team's collaboration and effort.
